Experience

Objective C : 6+years

Swift : 6+ years

March 2017 – Present
(3 years)

Tesco, Bangalore
SDE – 3

From boosting the performance to optimising whole Tesco Clubcard app, generated an increment of near 3 million users in 6 month time. Timely update to features and introduction of some new ones really helped to achieve this crowd. I am also a part of App merge project, which intent to merge all current applications to a single source.

July 2015 – March 2017
(1 year and 9 months)

Paytm, Bangalore
Senior Software Engineer

Handling verticals from end to end on iOS side, Paytm Hotels, Events were really a good addition to my skill levels. Publishing Plug n Play components for Paytm (which is currently used by internal apps) and working on Wallet features drove my attention more into Security related features in iOS.

November 2010 – July 2015
(4 years and 10 months)

RapidValue Solutions, Kochi
Senior Software Engineer

Was a part of development of over 25 applications. Some of them were from scratch and some were enhancements/maintenance projects. Was responsible of handling more than 10 team members and led role of Team Lead in some projects. Some of the major projects which I have worked with are the following:

Fidelity Watch | eBay Fashion | duWellness | Collaaj | GreenVolts

Maestro.fm | Hart Energy Directories | ElDiario | Ahlan | MDMagazine

More In Detail About Projects

Product in Tesco

Tesco Clubcard	Currently working on improvising the existing architecture of Tesco Clubcard. Setting up coding standard for Tesco Clubcard App. Providing performance analysis and improvement plans.
----------------	--

Product in Paytm

Paytm Wallet	Worked on revamp of wallet application which is now merged with main application of Paytm. Focussing mainly on improving the performance in the terms of battery/energy consumption and API performance response timings. Newer design implementation is also a part of this upcoming version.
Paytm Hotels	Worked on developing Paytm Hotels category from ground up. From design integration to launch, I was responsible for getting everything on track from iOS side. The application (category) is live on Appstore right now.
Paytm Events	Worked on developing Paytm Events category from scratch. Events treated as a vertical within Paytm Main application. Deals with Events in each city letting user to book tickets for the same.

Projects in RapidValue

Fidelity Watch Client: Fidelity Int, Gurgaon	Worked in Apple Watch integration for Fidelity International in Gurgaon. Implemented the Apple Watch version for the existing Fidelity iPhone application.
ebay Fashion Client: eBay Inc, US	Was responsible for leading a team of 10, for enhancements and feature additions on eBay Fashion application. Launched 4 versions of eBay fashion successfully from 3.0 to 3.4. Link: https://itunes.apple.com/in/app/ebay-fashion/id378358380?mt=8

duWellness

Client: EITC, Dubai

Was responsible for leading a team of 6, for development of health related application for du Telecom. Integrated Fitbit, Jawbone, Nike+ wrist bands to duWellness application and integrated tracking of calorie intake, steps calculation etc to give more information to user.

Link: <https://itunes.apple.com/in/app/du-wellness/id726185510?mt=8>

Collaaj

Client: Collaaj Inc, California, USA

Developed complete application of Product Collaaj from ground up. I was the only developer working on this product for its launch and thereafter two versions of it. Collaaj can be used for Business meetings with live webcam recording and video creations.

Link: <https://itunes.apple.com/in/app/collaaj/id588951380?mt=8>

GreenVolts

Client: GreenVolts Inc., USA

GreenVolts application handles the configuration settings to be done for Solar panels located in the fields without physically going to the location. All the hardware controls are being handled through an iPad. This was developed as an ERP application to the Employees of GreenVolts.

Maestro.fm

Client: Maestro.fm, USA

Maestro.fm deals with streaming music which users can add/modify their playlist on the run. Was responsible for creating online streaming of music through the AudioStreamer library created by Matt Gallagher.

Link: <https://itunes.apple.com/in/app/maestro.fm/id324246243?mt=8>

Hart Energy Directories

Client: Hart Energy Inc., USA

Directory application deals with the contact details of all business relations for HartEnergy Inc. Millions of Data handling is done in this application using SQLite and CoreData integrations. Over 3 million data was searched and queried in this application. This application holds all the informations within the application. No server integration is applied in this application.
